# FUEL MODULES

## TECHNICAL SPECIFICATIONS

### Application

Mounted from the top of the tank with various sealing arrangements, to monitor fuel volume and provide fuel delivery via electric fuel pump and reservoir.

### Electrical Ratings

System voltage: 12V

System polarity: Negative earth

### Thermal

Temperature ranges:

Functional -30°C to +75°C

Storage -40°C to +85°C

### Design features

Fuel pump specifications to suit customer requirements.

Thick film technology fuel measuring system.
